RE: Olga Alvarez, ASID, IIDA, LEED-AP

During the year 2009, I had the pleasure of partnering with Olga Alvarez for several community outreach programs sponsored by Turner Construction Company. Olga provided instructional information for our Turner School of Construction Management Series held in Broward County, Florida in partnership with Broward County Public Schools, Broward College and Broward County Government. The courses she instructed were namely, “How to get LEED Accredited” and “Introduction to Green Building”. Olga was very thorough and provided the information in a format that was information friendly to the students. There were 92 student graduates in attendance for this 10 week program.

After the students graduated from class, Olga agreed to offer the LEED-AP exam prep course to the students. Twenty (20) graduates from the class registered for the class and four proceeded to take and pass the exam. Olga’s teaching style contributed to the success of these four students.

I highly recommend Olga Alvarez for providing instructional information about LEED or Green Building. She is very organized, attentive, patient and a pleasure to work with. Kudos to Olga!

Rhonda Wimberly
